

## **InfoTech in Children's Health Care**

1. Care provider order entry with decision support.
2. Guideline-based documentation tools.
3. Internet-based disease management resources.
4. Teleconsultation.
5. Electronic health records other than order entry or documentation tools.

• AHRQ: Five technologies have the greatest potential to improve patient safety -  
Johnson KB, Davison CL. *Ambul Pediatr* 4(1):64-72, 2004 (AHRQ grant HS11868).
